

Hi there. I urge you to please reject the NAB petition 04-160. The reason I say this is because XM satellite radio allows me to hear what's going on loud and clear. With standard radio reception, it's difficult to hear what the announcer is saying. Also, with XM's instant traffic and weather programs, I can find out what kind of traffic I will be encountering before I get to the area.

I am paying a subscription fee to XM satellite radio and feel that I should have the right to decide if I want to listen to standard broadcast or satellite radio broadcast.

The way I see it, it's a lot like watching television and having my choice between the regular Discovery Channel or Discovery Channel in high definition.

Thank you.
